TOOL DESCRIPTIONS

Open End Wrench- a wrench with two open ends

Box End Wrench- a high torque wrench with two closed ends

Combination Wrench- a wrench with both open and closed ends

Ratchet - a wrench with ratchet movement, used with a socket

Allen Wrench- used to tighten/loosen Allen screws

Pipe Wrench- has adjustable jaw that tightens to hold tight when torque is applied to handle

Tongue and Groove/Locking Pliers - Pliers commonly used for turning and holding nuts and bolts, gripping odd shaped objects, and clamping materials. Can be locked into place.

Linemen's Pliers- pliers used to do electrical work

Diagonal Cutters- cutters used as side cutters to cut wire

Needle Nose Pliers- pliers that come to a point

Curved Claw Hammer- hammer used to do construction work

Sledge Hammer- a heavy weight hammer with a long handle used for hitting objects

Ball-Peen Hammer- a hammer with a round point on one end and a flat head on the other end

Rubber Mallet- a light hammer that does not dent objects when struck

Cold Chisel- a chisel, which has a flat tip and used to notch and move stuck bolts

Round Chisel- a chisel with a round tip

Flat Blade Screwdriver- a screwdriver with a flat tip

Phillips Screwdriver- a screwdriver that has a head that ridges intersect like an X

Offset Screwdriver- a screwdriver with screw heads offset 90 degrees from each other and is used to remove or replace screws in tight areas

Power Drill- used with a drill bit to drill holes

Hacksaw- saw used to cut metal or plastic

Bolt Cutters- used to cut bolts

Tin Snips- used to cut thin sheet metal

Round Punch- reduces hammer force to a small area

Pin Punch- used to drive out small objects, cotter keys and key locks

Center Punch- used to mark metal or plastic for drilling

Flat File- use to sharpen blades

Half Round File- used to remove metal burrs from inside large round objects

Triangular File- use to remove metal burrs from L shaped objects

Round File- used to remove metal burrs from small round objects

Machinist Vice- light weight vice for general shop use

General Utility Vice- heavy weight vice for heavy shop work

Outside Caliper- used to measure outside diameter of an object

Inside Caliper- used to measure inside diameter of an object

Micrometer- precise measurement device often found in machine shops and used for measuring the outside of objects

Feeler Gauge- used for setting air gaps on various objects such as spark plugs

Metal Framing Square- measurement device often used in construction for cutting straight lines and 90-degree angles

Steel Tape Measure- most frequently used measuring device and measuring tape is coiled inside a small case

Combination Square- an adjustable square with grooved 12-inch metal rule

Wood Clamp- clamp used to hold pieces of wood in place

Drill Bit- detachable cutting tool used to cut circular holes; the cutting end of a drill

Bar Clamp- designed for spanning wide work. It has a metal pipe with screw clamps and an adjustable stop mounted on the pipe.

Locking Pliers- pliers that can be locked in place

Adjustable Wrench- wrench that is adjustable to different sized nuts and bolts

Socket- Receptacle used to tighten or loosen hex shaped fasteners to be used with a ratchet or other square-drive device

Flat Nail Bar- A flat hand bar of steel with a slightly bent, wedge-shaped end, which is sometimes forked. Used as a pry or lever.

Slip-joint Pliers- Pliers with a joint adjustable to two positions in order to increase the opening of the jaws

Wire Brush- Pliers with a joint adjustable to two positions in order to increase the opening of the jaws

C-Clamp- The C-clamp is a type of clamp device typically used to hold a wood or metal work piece.

Utility Knife- a common tool used in various trades and crafts for a variety of purposes

JOB READINESS

Tool Identification Test

1. A wrench with two open ends.
 - a. Box End Wrench
 - b. Combination Wrench
 - c. Hex Allen Wrench
 - d. Open End Wrench

2. A high torque wrench with two closed ends.
 - a. Box End Wrench
 - b. Combination Wrench
 - c. Hex Allen Wrench
 - d. Open End Wrench

3. A wrench with both open and closed ends.
 - a. Box End Wrench
 - b. Combination Wrench
 - c. Hex Allen Wrench
 - d. Open End Wrench

4. A wrench with ratchet movement, used with a socket.
 - a. Adjustable Wrench
 - b. Hex Allen Wrench
 - c. Pipe Wrench
 - d. Ratchet Wrench

5. A tool used to tighten/loosen Allen screws.
 - a. Box End Wrench
 - b. Combination Wrench
 - c. Hex Allen Wrench
 - d. Open End Wrench

6. A tool that has an adjustable jaw that tightens to hold tight when torque is applied to handle.
 - a. Adjustable Wrench
 - b. Hex Allen Wrench
 - c. Pipe Wrench
 - d. Ratchet Wrench

7. Pliers commonly used for turning and holding nuts and bolts, gripping odd shaped objects, and clamping materials.

- a. Diagonal Cut Pliers
- b. Lineman's Pliers
- c. Needle Nose Pliers
- d. Locking Pliers/Tongue & Groove Pliers

8. Pliers used to do electrical work.

- a. Diagonal Cut Pliers
- b. Lineman's Pliers
- c. Needle Nose Pliers
- d. Slip Joint Pliers

9. Cutters used as side cutters to cut wire.

- a. Diagonal Cut Pliers
- b. Lineman's Pliers
- c. Needle Nose Pliers
- d. Slip Joint Pliers

10. Pliers that come to a point.

- a. Diagonal Cut Pliers
- b. Lineman's Pliers
- c. Needle Nose Pliers
- d. Slip Joint Pliers

11. A hammer used to do construction work.

- a. Ball Peen Hammer
- b. Curved Claw Hammer
- c. Shop Hammer
- d. Sledge Hammer

12. A heavy weight hammer with a long handle used for hitting objects.

- a. Ball Peen Hammer
- b. Curved Claw Hammer
- c. Shop Hammer
- d. Sledge Hammer

13. A hammer with a round point on one end and a flat head on the other end.

- a. Ball Peen Hammer
- b. Curved Claw Hammer
- c. Shop Hammer
- d. Sledge Hammer

14. Clamp for spanning wide work. It has a metal pipe with screw clamps and an adjustable stop mounted on the pipe.

- a. Bar Clamp
- b. Flat Nail Bar
- c. Utility Knife
- d. Wood Clamp

15. A light hammer that does not dent objects when struck.

- a. Ball Peen Hammer
- b. Curved Claw Hammer
- c. Rubber Mallet
- d. Sledge Hammer

16. A chisel, which has a flat tip used to notch and move stuck bolts.

- a. Cold Chisel
- b. Flat Nail Bar
- c. Round Nose Chisel
- d. Round Punch

17. A chisel with a round tip.

- a. Cold Chisel
- b. Flat Nail Bar
- c. Round Nose Chisel
- d. Round Punch

18. Pliers that can be locked in place.

- a. Diagonal Cut Pliers
- b. Locking Pliers
- c. Needle Nose Pliers
- d. Slip Joint Pliers

19. Wrench that is adjustable to different sized nuts and bolts.

- a. Adjustable Wrench
- b. Hex Allen Wrench
- c. Pipe Wrench
- d. Ratchet Wrench

20. A screwdriver with a flat tip.

- a. Drill Bit
- b. Flat Blade Screwdriver
- c. Offset Screwdriver
- d. Phillips Screwdriver

21. A screwdriver that has a head with ridges that intersect like an X.
- Drill Bit
 - Flat Blade Screwdriver
 - Offset Screwdriver
 - Phillips Screwdriver
22. A screwdriver with screw heads offset 90 degrees from each used to remove or replace screws in tight areas.
- Drill Bit
 - Flat Blade Screwdriver
 - Offset Screwdriver
 - Phillips Screwdriver
23. Used with a drill bit to drill holes.
- General Utility Vise
 - Hacksaw
 - Machinist Vise
 - Power Drill
24. A tool used to cut metal or plastic.
- General Utility Vise
 - Hacksaw
 - Machinist Vise
 - Power Drill
25. Used to cut bolts.
- Bolt Cutter
 - Diagonal Cut Pliers
 - Machinist Vise
 - Tin Snips
26. Used to cut thin sheet metal.
- Bolt Cutter
 - Diagonal Cut Pliers
 - Machinist Vise
 - Tin Snips
27. Reduces hammer force to a small area.
- Center Punch
 - Drill Bit
 - Pin Punch
 - Round Punch

28. Used to drive out small objects, cotter keys, and key locks.

- a. Center Punch
- b. Drill Bit
- c. Pin Punch
- d. Round Punch

29. Used to mark metal or plastic for drilling.

- a. Center Punch
- b. Drill Bit
- c. Pin Punch
- d. Round Punch

30. Used to sharpen blades.

- a. Flat File
- b. Half Round File
- c. Round File
- d. Triangular File

31. Used to remove metal burrs from inside large round objects.

- a. Flat File
- b. Half Round File
- c. Round File
- d. Triangular File

32. Used to remove metal burrs from L shaped objects.

- a. Flat File
- b. Half Round File
- c. Round File
- d. Triangular File

33. Used to remove metal burrs from inside small round objects.

- a. Flat File
- b. Half Round File
- c. Round File
- d. Triangular File

34. A lightweight vise for general shop use.

- a. General Utility Vise
- b. Hacksaw
- c. Machinist Vise
- d. Power Drill

35. A heavy weight vise for heavy shop work.

- a. General Utility Vise
- b. Hacksaw
- c. Machinist Vise
- d. Power Drill

36. Used to measure outside diameter of an object.

- a. Feeler Gauge
- b. Inside Caliper
- c. Outside Caliper
- d. Steel Tape Measure

37. Used to measure inside diameter of an object.

- a. Feeler Gauge
- b. Inside Caliper
- c. Outside Caliper
- d. Steel Tape Measure

38. Precise measurement device often found in machine shops and used for measuring to 1000th of an inch.

- a. Feeler Gauge
- b. Micrometer
- c. Outside Caliper
- d. Steel Tape Measure

39. Used for setting air gaps on various objects such as spark plugs.

- a. Feeler Gauge
- b. Micrometer
- c. Outside Caliper
- d. Steel Tape Measure

40. Measurement device often used in construction for marking straight lines and 90-degree angles.

- a. Framing Square
- b. Inside Caliper
- c. Outside Caliper
- d. Steel Tape Measure

41. Most frequently used measuring device. Measuring tape is coiled inside a small case.

- a. Framing Square
- b. Inside Caliper
- c. Outside Caliper
- d. Steel Tape Measure

42. An adjustable square with grooved 12-inch metal rule.

- a. Combination Square
- b. Framing Square
- c. Outside Caliper
- d. Steel Tape Measure

43. Receptacle used to tighten or loosen hex shaped fasteners to be used with a ratchet or other square-drive device.

- a. Adjustable Wrench
- b. Drill Bit
- c. Pipe Wrench
- d. Socket

44. A clamp used to hold pieces of wood in place.

- a. Flat Nail Bar
- b. Utility Knife
- c. Wire Brush
- d. Wood Clamp

45. A detachable cutting tool used to cut circular holes; the cutting end of a drill.

- a. Center Punch
- b. Drill Bit
- c. Pin Punch
- d. Round Punch

46. A flat hand bar of steel with a slightly bent wedge-shaped end, which is sometimes forked. used as a pry bar or lever.

- a. C-Clamp
- b. Flat Nail Bar
- c. Utility Knife
- d. Wood Clamp

47. Pliers with a joint adjustable to two positions in order to increase the opening of the jaws.

- a. Diagonal Cut Pliers
- b. Lineman's Pliers
- c. Needle Nose Pliers
- d. Slip Joint Pliers

48. A tool with a wood or plastic handle and steel wire bristles used for cleaning rust and removing paint.

- a. Flat Nail Bar
- b. Utility Knife
- c. Wire Brush
- d. Wood Clamp

49. C-shaped clamping device typically used to hold a wood or metal work piece.

- a. C-Clamp
- b. Flat Nail Bar
- c. Utility Knife
- d. Wood Clamp

50. A cutting tool used in various trades and crafts for a variety of purposes.

- a. Flat Nail Bar
- b. Utility Knife
- c. Wire Brush
- d. Wood Clamp

Tool Identification Test

1. A wrench with two open ends.

- a. Box End Wrench
- b. Combination Wrench
- c. Hex Allen Wrench
- d. Open End Wrench

2. A high torque wrench with two closed ends.

- a. Box End Wrench
- b. Combination Wrench
- c. Hex Allen Wrench
- d. Open End Wrench

3. A wrench with both open and closed ends.

- a. Box End Wrench
- b. Combination Wrench
- c. Hex Allen Wrench
- d. Open End Wrench

4. A wrench with ratchet movement, used with a socket.

- a. Adjustable Wrench
- b. Hex Allen Wrench
- c. Pipe Wrench
- d. Ratchet Wrench

5. A tool used to tighten/loosen Allen screws.

- a. Box End Wrench
- b. Combination Wrench
- c. Hex Allen Wrench
- d. Open End Wrench

6. A tool that has an adjustable jaw that tightens to hold tight when torque is applied to handle.

- a. Adjustable Wrench
- b. Hex Allen Wrench
- c. Pipe Wrench

d. Ratchet Wrench

7. Pliers commonly used for turning and holding nuts and bolts, gripping odd shaped objects, and clamping materials.

- a. Diagonal Cut Pliers
- b. Lineman's Pliers
- c. Needle Nose Pliers
- d. Channellocks/Tongue & Groove Pliers

8. Pliers used to do electrical work.

- a. Diagonal Cut Pliers
- b. Lineman's Pliers
- c. Needle Nose Pliers
- d. Slip Joint Pliers

9. Cutters used as side cutters to cut wire.

- a. Diagonal Cut Pliers
- b. Lineman's Pliers
- c. Needle Nose Pliers
- d. Slip Joint Pliers

10. Pliers that come to a point.

- a. Diagonal Cut Pliers
- b. Lineman's Pliers
- c. Needle Nose Pliers
- d. Slip Joint Pliers

11. A hammer used to do construction work.

- a. Ball Peen Hammer
- b. Curved Claw Hammer
- c. Shop Hammer
- d. Sledge Hammer

12. A heavy weight hammer with a long handle used for hitting objects.

- a. Ball Peen Hammer
- b. Curved Claw Hammer
- c. Shop Hammer
- d. Sledge Hammer

13. A hammer with a round point on one end and a flat head on the other end.

- a. **Ball Peen Hammer**
- b. Curved Claw Hammer
- c. Shop Hammer
- d. Sledge Hammer

14. Clamp for spanning wide work. It has a metal pipe with screw clamps and an adjustable stop mounted on the pipe.

- a. **Bar Clamp**
- b. Flat Nail Bar
- c. Utility Knife
- d. Wood Clamp

15. A light hammer that does not dent objects when struck.

- a. Ball Peen Hammer
- b. Curved Claw Hammer
- c. **Rubber Mallet**
- d. Sledge Hammer

16. A chisel, which has a flat tip used to notch and move stuck bolts.

- a. **Cold Chisel**
- b. Flat Nail Bar
- c. Round Nose Chisel
- d. Round Punch

17. A chisel with a round tip.

- a. Cold Chisel
- b. Flat Nail Bar
- c. **Round Nose Chisel**
- d. Round Punch

18. Pliers that can be locked in place.

- a. Diagonal Cut Pliers
- b. **Locking Pliers**
- c. Needle Nose Pliers
- d. Slip Joint Pliers

19. Wrench that is adjustable to different sized nuts and bolts.

- a. Adjustable Wrench
- b. Hex Allen Wrench
- c. Pipe Wrench
- d. Ratchet Wrench

20. A screwdriver with a flat tip.

- a. Drill Bit
- b. Flat Blade Screwdriver
- c. Offset Screwdriver
- d. Phillips Screwdriver

21. A screwdriver that has a head with ridges that intersects like an X.

- a. Drill Bit
- b. Flat Blade Screwdriver
- c. Offset Screwdriver
- d. Phillips Screwdriver

22. A screwdriver with screw heads offset 90 degrees from each used to remove or replace screws in tight areas.

- a. Drill Bit
- b. Flat Blade Screwdriver
- c. Offset Screwdriver
- d. Phillips Screwdriver

23. Used with a drill bit to drill holes.

- a. General Utility Vise
- b. Hacksaw
- c. Machinist Vise
- d. Power Drill

24. A tool used to cut metal or plastic.

- a. General Utility Vise
- b. Hacksaw
- c. Machinist Vise
- d. Power Drill

25. Used to cut bolts.

- a. Bolt Cutter
- b. Diagonal Cut Pliers
- c. Machinist Vise

d. Tin Snips

26. Used to cut thin sheet metal.

- a. Bolt Cutter
- b. Diagonal Cut Pliers
- c. Machinist Vise
- d. Tin Snips

27. Reduces hammer force to a small area.

- a. Center Punch
- b. Drill Bit
- c. Pin Punch
- d. Round Punch

28. Used to drive out small objects, cotter keys, and key locks.

- a. Center Punch
- b. Drill Bit
- c. Pin Punch
- d. Round Punch

29. Used to mark metal or plastic for drilling.

- a. Center Punch
- b. Drill Bit
- c. Pin Punch
- d. Round Punch

30. Used to sharpen blades.

- a. Flat File
- b. Half Round File
- c. Round File
- d. Triangular File

31. Used to remove metal burrs from inside large round objects.

- a. Flat File
- b. Half Round File
- c. Round File
- d. Triangular File

32. Used to remove metal burrs from L shaped objects.

- a. Flat File
- b. Half Round File
- c. Round File

d. **Triangular File**

33. Used to remove metal burrs from inside small round objects.

- a. Flat File
- b. Half Round File
- c. **Round File**
- d. Triangular File

34. A lightweight vise for general shop use.

- a. General Utility Vise
- b. Hacksaw
- c. **Machinist Vise**
- d. Power Drill

35. A heavy weight vise for heavy shop work.

- a. **General Utility Vise**
- b. Hacksaw
- c. Machinist Vise
- d. Power Drill

36. Used to measure outside diameter of an object.

- a. Feeler Gauge
- b. Inside Caliper
- c. **Outside Caliper**
- d. Steel Tape Measure

37. Used to measure inside diameter of an object.

- a. Feeler Gauge
- b. **Inside Caliper**
- c. Outside Caliper
- d. Steel Tape Measure

38. Precise measurement device often found in machine shops and used for measuring to 1000th of an inch.

- a. Feeler Gauge
- b. **Micrometer**
- c. Outside Caliper
- d. Steel Tape Measure

39. Used for setting air gaps on various objects such as spark plugs.

- a. **Feeler Gauge**
- b. Micrometer
- c. Outside Caliper

d. Steel Tape Measure

40. Measurement device often used in construction for marking straight lines and 90-degree angles.

- a. Framing Square
- b. Inside Caliper
- c. Outside Caliper
- d. Steel Tape Measure

41. Most frequently used measuring device. Measuring tape is coiled inside a small case.

- a. Framing Square
- b. Inside Caliper
- c. Outside Caliper
- d. Steel Tape Measure

42. An adjustable square with grooved 12-inch metal rule.

- a. Combination Square
- b. Framing Square
- c. Outside Caliper
- d. Steel Tape Measure

43. Receptacle used to tighten or loosen hex shaped fasteners to be used with a ratchet or other square-drive device.

- a. Adjustable Wrench
- b. Drill Bit
- c. Pipe Wrench
- d. Socket

44. A clamp used to hold pieces of wood in place.

- a. Flat Nail Bar
- b. Utility Knife
- c. Wire Brush
- d. Wood Clamp

45. A detachable cutting tool used to cut circular holes; the cutting end of a drill.

- a. Center Punch
- b. Drill Bit
- c. Pin Punch
- d. Round Punch

46. A flat hand bar of steel with a slightly bent wedge-shaped end, which is sometimes forked. Used as a pry bar or lever.

- a. C-Clamp
- b. Flat Nail Bar

- c. Utility Knife
- d. Wood Clamp

47. Pliers with a joint adjustable to two positions in order to increase the opening of the jaws.

- a. Diagonal Cut Pliers
- b. Lineman's Pliers
- c. Needle Nose Pliers
- d. Slip Joint Pliers

48. A tool with a wood or plastic handle and steel wire bristles used for cleaning rust and removing paint.

- a. Flat Nail Bar
- b. Utility Knife
- c. Wire Brush
- d. Wood Clamp

49. C-shaped clamping device typically used to hold a wood or metal work piece.

- a. C-Clamp
- b. Flat Nail Bar
- c. Utility Knife
- d. Wood Clamp

50. A cutting tool used in various trades and crafts for a variety of purposes.

- a. Flat Nail Bar
- b. Utility Knife
- c. Wire Brush
- d. Wood Clamp

CONTEST MATERAIL LIST- TOOL IDENTIFICATION CONTEST

2	6x6 Blocks of Wood
1	3/8 Hex Bolt
2	3/8 Flat Washer
1	3/8 Lock Washer
1	3/8 Nut

TOOLS NEEDED

- Wood Clamp**
- 7/16 Drill Bit**
- Tape Measure**
- Framing Square**
- 9/16 Box End Wrench**
- 9/16 Socket and Ratchet**

Contest host will include 10 additional tools that would not be used to complete the task.

Contestant No. _____

Time Started _____ Time Finished _____

*****Time will be a factor if there is a tie*****

- #1 Tool Name Score (50 Possible)** _____
- #2 Tool Retrieval Score (50 Possible)** _____
- #3 Skill Demonstration Score (50 Possible)** _____
- #4 Vocabulary Test Score (100 Possible)** _____
- Student Resume' yes 0 points / no -12 points** _____
